## Single shaft shredder WS 2000 M

The WS 2000 M ZEUS shredder is a single shaft shredder specifically designed to shred industrial and urban waste, bulky cumbersome items, waste wood, leaves and grass, pallets, and plastic containers.

The machine's structure is robust and its simple design facilitates all maintenance work. The oscillating system of fixed cutters guarantees the machine against damage when it discharges unshreddable items. This makes the machine suitable for treating heterogeneous materials.

It is also possible to set the machine up in an unloadable version for landfill and eco-centre applications, or in a static version as a main volume reduction machine.

### WS 2000 M

<b>Motorisation</b>	1x132 Eléctrico	<b>Dimensions cutting chamber</b>	2100 x 2000 mm
<b>Weight</b>	14000 kg	<b>Rotors</b>	625 mm
<b>Overall dimensions (LxHxD)</b>	2090 x 6020 x 2290 mm	<b>Applications</b>	Solid urban waste and bulky cumbersome items
<b>Type of cutters</b>	15 cutting teeth	<b>Performance</b>	15 - 30 t/h
